

BE-4301-en

BE-4301-en is a non-contact Infrared thermometer with voice report function. The design is compact, simple and modern. It adopts big screen with user-friendly interface to display and report temperature information. BE-4301-en can measure humanbody temperature from 8 to 20cm at high accuracy. For different temperature range, it will display green, orange and red backlight.

There are two types of installation methods: wall-mounting and tripod mounting. Without taking close to the device to measure body temperature, it reduces the risk of cross infection. This device is suitable for schools, offices, buses, vehicles, supermarkets, parking lots and other environments.

| Specifications |

Measuring Range	32-42.9 °C
Accuracy	±0.3 °C
Measuring Distance	8-20 cm
LCD Backlight	Red/Green/Orange
Display Language	English
Voice Language	English
High temperature Alarm	Yes
Temperature Unit	Celsius/Fahrenheit
Measuring Speed	Less than 2s
Energy Saving Mode	Auto Sleeping and Waking Up
Storage Memory	20 Groups
Working Environment	10-35 °C
Power Supply	USB 5V/1A (Type C)
Standby Power Consumption	50mw
Gross Weight	About 0.5KG
Dimension	110mm*80mm*27mm
